

## PATENTS

1. S. H. Chen, J. C. Mastrangelo, H. Shi, and S. Krishnamurthy, "Thermotropic Chiral Nematic Liquid Crystalline Copolymers," U.S. Patent No. 5,332,522; July 26, 1994.
2. S. H. Chen and H. Shi, "Glassy Chiral Nematic Liquid Crystalline Compositions of Low Molar Mass and Optical Devices Formed from Same," U.S. Patent No. 5,378,393; January 3, 1995.
3. S. H. Chen and H. Shi, "Glassy Low Molar Mass Chiral Nematic Liquid Crystalline Compositions and Optical Articles Formed Therefrom," U.S. Patent No. 5,514,296; May 7, 1996.
4. S. H. Chen and H. Shi, "Chiral Nematic Liquid Crystalline Compositions," European Patent No. 0,729,498, B1; July 25, 2001.
5. S. H. Chen and F. Y. Fan, "Glass-Forming Liquid Crystalline Compositions of Low Molar Mass and Optical Devices Formed Therefrom," U.S. Patent No. 6,558,572 B2; May 6, 2003.
6. S. H. Chen and F. Y. Fan, "Glass-Forming Liquid Crystalline Compositions of Low Molar Mass and Optical Devices Formed Therefrom," U.S. Patent No. 6,730,242 B2; May 4, 2004.
7. S. H. Chen and P. H. M. Chen, "Glassy Chiral-Nematic Liquid Crystals and Optical Devices Containing the Same," U.S. Patent No. 7,001,648; February 21, 2006.
8. S. H. Chen and Y. Geng, "Light-Emitting Organic Oligomer Compositions," U.S. Patent No. 7,057,009 B2; June 6, 2006.
9. S. W. Culligan, Y. Geng, S. H. Chen, K. P. Klubek, K. M. Vaeth, and C. W. Tang, "Organic Light-Emitting Diodes for Production of Polarized Light," U.S. Patent No. 7,037,599 B2; May 2, 2006.
10. S. H. Chen and C. Kim, "Cholesteric Glassy Liquid Crystals with Hybrid Chiral-Nematic Mesogens," U. S. Patent No. 8,562,863 B2; October 22, 2013.
11. S. H. Chen, L. Zeng, and Y.-H. Lee, "Hybrid Host Materials for Electrophosphorescent Devices," U. S. Patent No. 9,040,718 B2; May 26, 2015.
12. S. H. Chen and M. Anthamatten, "Mesomorphic Ceramics Films via Blade Coating of Nanorod Suspensions for High-Power Laser Applications," U. S. Patent Application, Serial Number 17/604,839; filed October 19, 2021.
13. S. H. Chen, M. Anthamatten, and J. Ou, "One-Way Circularly Polarized Light Generated by Propagation through Ch-GLC Films Doped with Light-Absorbing Dyes," Provisional U. S. Patent Application, Atty Dkt. 306-0032PRO; (UR 2-21022).
